To whom it may concern:

It is my pleasure to recommend David Exe to provide Electrical Engineering Services for Industrial Applications. I have worked with David for the past 2 years on a large greenfield industrial facility in the Northwest. David provided electrical engineering services for power distribution, equipment specification, grounding and lighting. David was extremely accommodating on this fast-paced project. I am confident Dave's exceptional skills in design, professional experience and personal qualities will make him an excellent resource for any project.

Dave Exe has my recommendation for engineering design. I have no doubt he will provide you a quality product in a timely fashion.

Regards,

A handwritten signature in blue ink, appearing to read "Fred Parker". The signature is fluid and cursive, with a long horizontal stroke extending to the left.
