To whom it may concern

## **Re: David Exe Industrial Engineering**

### **Professional Reference**

I have worked with Industrial Engineering since opening my firm eleven years ago. We have worked together on a wide range of projects from new buildings to small tenant improvements. But, regardless of the scale, David Exe has always provided very professional and thorough consulting engineering services and exceptional drawings. I look forward to continuing our professional relationship in the future and highly recommend his firm to anyone seeking, electrical and or mechanical engineering services.

Sincerely,

Bob McElheney AIA
